

ISSUES AND OPTIONS IN NORTHWEST BIOENERGY:
CANOLA FOR BIODIESEL

CASCADIA CARBON INSTITUTE

Steve Verhey, Ph.D

Denise Horton, Agronomist

October 19, 2007

About the authors

Steven Verhey, Ph.D -- Steven Verhey is President of Cascadia Carbon Institute, and is also founding Chief Executive Manager at Central Washington Biodiesel LLC, a rationally-sized biodiesel company in Ellensburg, WA. Prior to moving to the energy/agriculture sector he spent more than 10 years as an agricultural scientist and academic, specializing in agricultural biological technology. A graduate of Reed College, he holds a Ph.D from Oregon State University (where his active involvement in sustainable agriculture began) and an MS from the University of Washington. He is an adjunct faculty member in the Department of Crop and Soil Sciences at Washington State University and a member of the Washington Brassica Seed Working Group.

Denise Horton -- Since graduating *summa cum laude* from the Department of Crop and Soil Sciences at Oregon State University, Denise has pursued her interest in seed science, seed technology, and sustainable agriculture which has led to her work on oilseeds. She serves as agronomist for Central Washington Biodiesel in Ellensburg and is a member of the Cascadia Carbon Institute's Advisory Board.

About The Cascadia Carbon Institute

As a sustainability think tank focusing on energy, agriculture, and education, the mission of the Cascadia Carbon Institute (CCI) is to educate policymakers, agriculturalists, members of the energy industry, and the public about matters related to sustainability, agriculture, bioenergy, and global climate change. The Institute also offers consulting services related to these same issues, including sustainability due diligence.

Issues and Options in Northwest Bioenergy: Canola for Biodiesel

TABLE OF CONTENTS

Executive Summary	3
I. Northwest Agricultural Geography	5
The importance of irrigation	6
Non-irrigated agriculture	7
The importance of crop rotation	8
II. Feedstocks for Biodiesel from Northwest Agriculture	9
Canola, rapeseed, and mustard	10
Camelina	10
Soybeans and safflower	11
Tallow, yellow grease, algae	11
III. Canola's Place in Northwest Agriculture	11
The special situation in Washington	12
Canola in irrigated agriculture	13
Canola in dryland agriculture	14
Between harvest and fuel	14
IV. Unintended consequences?	15
CRP and Marginal Land	15
Oilseed Production and Vegetable Seed Production	16
Biodiesel and Food Production	17
V. The Northwest's Oilseed Production Capacity	17

Scenario 1: high estimate	18
Scenario 2: medium estimate	19
Scenario 3: low estimate	19
Other Northwest states	19
Summary	20
VI. Encouraging Northwest Oilseed Production	20
Branding and standards	21
Field - Food - Fuel	21
Certification	21
Incentives to farmers	22
Challenges to oilseed presses	22
Carbon credits	22
Cascadia Carbon Institute Advisory Board	24
Jim Baird, Baird Orchards	24
Steve Benning, Spokane Hutterian Brethren	24
Gaylin Davies, McKay Seed	24
Atul Deshmane, President, Whole Energy	24
Kevin Kuiper, Director of Marketing , Whole Energy	24
Ron Dunning, Touchet Seed & Energy	24
Ted Durfey, Natural Selection Farms	25
Becky Lyle, EarthBourne Resources, Inc.	25
Bill Warren, Warren Farms	25
